"Diagnostics in Social and Behavioral Epidemiology: A Discrete Latent Variable Modeling Approach"

Dr. Dumenci At A Glance…

Levent Dumenci is a professor at the Department of Social and Behavioral health at Virginia Commonwealth University School of Medicine. He received his PhD in Psychometrics and Statistics programs at Iowa State University. His primary research area is latent variable models in health sciences. He teaches two graduate level courses: Behavioral Measurement and Structural Equation Modeling.

Dr. Dumenci is a candidate for a faculty position in the future Department of Epidemiology and Biostatistics.
