The Department of Kinesiology at Temple University invites applications for a full-time tenure-track position (open-rank) in the area of Exercise Physiology/Exercise Biology. Candidates will be expected to maintain a robust, externally funded research program, and teach undergraduate and graduate courses. Candidates hired at the associate and full professor ranks will be expected to provide effective mentoring for trainees at the graduate and post-doctoral levels. The successful candidate will have an active research program that can support the Department’s current research focus on elucidating cellular and molecular mechanisms and/or phenomena that are responsible for the biological consequences of exercise and its health benefits. We seek a talented and productive faculty candidate with expertise and a research program in one or more of the following areas: 1) Determination of novel molecular mechanisms of the benefits of exercise using innovative approaches; 2) Characterization of the changes in cell metabolism/bioenergetics during exercise; 3) Identification of specific mechanisms that facilitate inter-organ crosstalk mechanisms and/or metabolic processes during exercise.

The undergraduate program in the Kinesiology department is comprised of exercise science and pre-health professions. The Integrative Exercise Physiology Graduate Program (offering MS and PhD) is one of four graduate programs within the department. For more information on the Kinesiology Program, please see http://cph.temple.edu/kinesiology/home. Kinesiology faculty members actively collaborate with researchers and clinicians at Temple University School of Medicine and Temple Hospital as well as Department of Bioengineering. The Department's facilities have been under a major renovation to expand research and classroom facilities, and faculty in the department have secured over $2.5 million in externally funded research support.

The College of Public Health, a constellation of nine academic units of public health, health profession and social work disciplines, enrolls almost 5,000 students. The College has seen remarkable growth and organizational expansion in the shape and configuration of programs, research profile, increase in rankings, and collaboration with other academic units. In 2014, the College ranked 2nd of the 17 colleges/schools at Temple in research expenditures. The College’s innovative research focuses on medical interventions, social, behavioral, and environmental inquiries, and basic science and is sponsored by NIH, NSF, and other major federal funders as well as foundations. Under the leadership of Dean Laura Siminoff, a public health social scientist continuously funded by NIH for 25 years, CPH is hiring 50 faculty to join the 160 faculty across its academic disciplines.
Temple University is an urban, research-intensive university located in Philadelphia, Pennsylvania. Temple is the 6th-largest provider of professional education in the country and includes Schools of Medicine, Pharmacy, Podiatry, and Dentistry in addition to research centers including the NCI-designated Fox Chase Cancer Center. Temple is located in historic and culturally-rich Philadelphia, the nation’s 5th largest city. The city was ranked 3rd by the New York Times as a world tourist destination.

**Desired Qualifications.** Candidates must possess an earned doctorate in exercise physiology or related biological science. Post-doctoral training (or equivalent professional experience) in the relevant field of research is preferred. At the rank of Assistant Professor, the ideal candidate will have published in high quality journals, demonstrated potential to secure extramural research funding, mentor graduate students, and teach undergraduate and graduate courses in the area of exercise science that complement existing curricular offerings. At the rank of Associate Professor or Professor, the successful candidate will have published in high quality, high impact journals, have an outstanding record of consistent and ongoing extramural research funding, and have experience in mentoring trainees at the graduate and/or postdoctoral levels and teaching undergraduate and graduate courses. Salary, rank, and tenure status will be commensurate with credentials and experience. The College offers highly competitive start-up packages and salaries. Review of applications will begin immediately and the appointment can begin as early as January 2016.

**How to apply.** Candidates should submit the following materials electronically to cphsearch@temple.edu: 1) curriculum vitae; 2) a personal statement of research focus including current and planned research agenda; 3) up to three examples of research articles; and 4) teaching philosophy and interests. Please provide the names of three references including phone numbers and e-mail addresses (reference letters are not needed at this time and no referee will be contacted without the candidate’s permission).

The search committee will review applications confidentially on a rolling basis until the position is filled. For best consideration, candidate should submit their application by **November 2, 2015**. Applications will be reviewed beginning immediately. For questions about the position, please contact Search Committee Chair, Joon Park (parkjy@temple.edu).

*Temple University is an equal opportunity/affirmative action institution.*

*People of color, women, veterans, and persons with disabilities are encouraged to apply.*
