Stephanie George, PhD
Cancer Epidemiologist at the National Cancer Institute

Thursday, November 13th  
Ritter Annex, Room 941
10:00 – 11:00 AM  
Open to all Faculty, Staff & Students

“Beyond an “Apple a Day”: Broadening the Lens of Energy Balance and Cancer Research”

Dr. George At A Glance…

Stephanie M. George, PhD, MPH, MA, is a cancer epidemiologist and postdoctoral fellow in the Applied Research Program of the Division of Cancer Control and Population Sciences at the National Cancer Institute. Dr. George conducts research to better understand the role of energy balance in the epidemiology of cancer and cancer survivorship. She also leads methodological research designed to improve diet and physical activity assessment.

Dr. George is trained in cancer epidemiology, public health, and communication, with degrees from Yale University (PhD in Cancer Epidemiology, MPH with concentration in Chronic Disease Epidemiology) and University of Maryland, College Park (MA and BA in Communication). She has received meritorious research awards from the Society of Behavioral Medicine, the Biennial Cancer Survivorship Conference, the American Institute for Cancer Research, the Obesity Society, and the National Institutes of Health.

Dr. George is a candidate for a faculty position in the future Department of Epidemiology and Biostatistics.
