Dr. Carol Ann Gross-Davis, Ph.D.
Adjunct Professor at Drexel University
School of Public Health

Thursday, October 30th
10:00 – 11:00 AM
Ritter Annex, Room 941
Open to all Faculty, Staff & Students

"When Environmental Exposures Cannot Be Observed Directly: Using Gene Environment Interaction Analysis"

Dr. Gross-Davis At A Glance...

Carol Ann Gross-Davis obtained her PhD at the Drexel University, School of Public Health in Philadelphia. Prior to that, she received a Masters in Engineering from Drexel University in Philadelphia. She is currently an Adjunct Professor in the School of Public Health at Drexel University and is working with the Air Protection Division, Monitoring and Analysis Branch at the Environmental Protection Agency.

Her research interests are centered in Environmental Health, specifically environmental exposures and risk of disease. Her previous work has explored suspected-diseases associated with environmental exposures due to climate change impacts, air pollution and Marcellus Shale exploration.

Dr. Gross-Davis is a candidate for a faculty position in the future Department of Epidemiology and Biostatistics.
