“Strategies for Data Analysis with Two Types of Missing Values”

Dr. Harel At A Glance...

Ofer Harel, Ph.D. is an associate professor in the Department of Statistics and a principal investigator in the Center for Health, Intervention, and Prevention at the University of Connecticut. Dr. Harel received his doctorate in statistics in 2003 from Penn State University; where he developed his methodological expertise in the areas of missing data techniques, diagnostic tests, longitudinal studies, bayesian methods, sampling techniques, mixture models, latent class analysis, and statistical consulting. Dr. Harel received his post-doctoral training at the University of Washington, Department of Biostatistics, where he worked for the HSR&D Center of Excellence, VA Puget Sound Healthcare System, and the National Alzheimer’s Coordinating Center. Dr. Harel has served as a biostatistical consultant nationally and internationally since 1997. Through his collaborative consulting, Dr. Harel has been involved with a variety of research fields including, but not limited to Alzheimer’s, diabetes, nutrition, HIV/AIDS, and alcohol and drug abuse prevention.

Dr. Harel is a candidate for a faculty position in the future Department of Epidemiology and Biostatistics.
