2:15pm – 4:00pm
Jones Hall, Room 425
Open to all Faculty, Staff & Students

"The Impact of the Sensory Environment on Participation of Individuals with Autism Spectrum Disorders."

Dr. Pfeiffer At A Glance…

Beth Pfeiffer has BA in Psychology and Special Education, and an MS and PhD in Occupational Therapy with a specialization in pediatrics. She is an Associate Professor in the Department of Rehabilitation Sciences at Temple University. She teaches in the Doctorate of Occupational Therapy program and mentors research in the entry-level and post-professional occupational therapy programs. Dr. Pfeiffer's research focuses on treatment and measurement of person environmental interactions in children and adults with Autism and Mental Health Disorders.

Dr. Pfeiffer is a candidate for a faculty position in the Department of Occupational Therapy.
