*Looking for Undergraduate Public Health Courses this Summer and Fall*

The College of Public Health offers a range of courses. Because of a re-structuring, four new SUBJECT names have been assigned to what had been courses within the Public Health department.

The new subject names are:

- Environmental Health - **ENVH**
- Epidemiology & Biostatistics - **EPBI**
- Health Policy Management - **HPM**
- Social and Behavioral Science - **SBS**

Please use the chart below to help your students with the conversion. If students are required to take a Public Health course for their major, minor, or certificate, the equivalent course with the new subject code satisfies the requirement.
