Temple University’s College of Public Health strives to solve health’s complexities for a better tomorrow. Our faculty prepare researchers, practitioners and educators to collaborate across disciplines to understand community needs, create evidence-based solutions, and deliver effective, compassionate care. We invite applications for non-tenure track faculty members in the Doctor of Athletic Training program to begin Summer or Fall 2020.

**Qualifications.** We are seeking an enthusiastic, dedicated certified athletic trainer with contemporary clinical expertise to serve as Clinical Education Coordinator and teach within the professional master’s (MSAT) and Doctor of Athletic Training (DAT) programs. The ideal candidate will have a strong record of clinical experience, teaching experience in a CAATE-accredited program, and clinical coordinator experience. Doctoral degree required, DAT or other clinical doctorate preferred. Must be BOC-certified and eligible to obtain licensure as an athletic trainer in Pennsylvania. We value diversity and seek individuals committed to inclusive practices in education, research, and practice.

**The Department of Health and Rehabilitation Sciences.** We are unlike any other department in the country. Located on a single urban campus in Philadelphia, the Department’s 38 full-time faculty provide instruction in 10 degree programs across all levels of education to approximately 1,300 students. The Department includes degrees in Health Professions (BS), Athletic Training (MSAT, DAT), Neuromotor Science (MS, PhD), Physical Therapy (DPT), Occupational Therapy (MOT, OTD) and Recreation Therapy (BS and MS). In addition, the Department offers 2 certificate programs (Health Outcomes and Measurement Science, Post-Professional Certificate in OT) and an Orthopedic PT Residency. Additionally, the Department works closely with other professions including public health, nursing, social work, and communication sciences.

Priority focus areas for the Department include interprofessional education/research, service learning and teaching excellence. Current research emphases are child health outcomes and patient-reported measures of health status for children, physical activity feedback technology for people with disabilities, community access for children with diverse sensory abilities, field-based interventions including recreation for adults with mental health disorders, measurement of environmental interactions for persons with autism spectrum disorders, and the development of devices using virtual environments to manipulate visual input for persons with traumatic brain injuries.

**The Athletic Training Program.** The athletic training program consists of a professional master’s degree program (MSAT), post-professional Master of Science in Kinesiology with a concentration in Athletic Training, and 100% online clinical doctorate program (DAT). In total, the program enrolls about 60-70 students taught currently by five full-time athletic training faculty with various clinical and research backgrounds who emphasize student learning & development through innovative and evidence based teaching practices. Our newly renovated (2017) academic space, located in Pearson Hall, features a smart classroom with ceiling-mount and wall-mount cameras for demonstrations and class capture, innovative teaching tools, and a wet lab with modalities adjacent to the teaching space. The MSAT program currently has affiliation agreements with over thirty clinical education sites and over forty preceptors.

**The College.** Devoted to an interprofessional environment for academic programming and research, the College of Public Health, a CEPH-accredited school of public health, is a constellation of academic units of public health, social work and health profession disciplines, enrolling 4,300 students. The College’s research focuses on social, behavioral, and environmental inquiries, medical/health interventions, and basic science and is sponsored by the National Institutes of Health, National Science Foundation, Department of Defense, and other major funders.
The College has recently launched a new Center focused on Community Engaged Research and Practice. We are harnessing the collective energies of our clinical disciplines through an emerging, innovative framework for interprofessional education.

The University. Temple is an urban, research-intensive Carnegie R1 university located in historic and culturally rich Philadelphia, the nation’s 6th largest city. The city was ranked 3rd by the New York Times as a world tourist destination. The National Science Foundation ranks Temple among the top 100 universities in the country for research expenditures. Temple is the 6th largest provider of professional education in the nation and includes Schools of Medicine, Pharmacy, Podiatry, Law, and Dentistry and research centers including CPH’s Center for Obesity Research and Education.

Applications. Appointments may be made at the non-tenure instructional track ranks of Assistant, Associate or Full Professor, dependent on qualifications. Salary and benefits are competitive and will be commensurate with credentials and experience. To apply, send a letter detailing clinical education, teaching and clinical experience and preparation and curriculum vitae with names of 3 references to Dr. Jamie Mansell at jmansell@temple.edu. Application review begins immediately and will continue until position is filled.

Temple University is an equal opportunity/affirmative action institution. People of color, women, veterans, and persons with disabilities are encouraged to apply.
