Epidemiology and Biostatistics

Tenure Track Open Rank
Faculty Positions in Infectious Disease,
Maternal Child Health and/or
Reproductive/Perinatal Epidemiology

The past year has magnified the ways that inequities—whether due to race, gender, sexuality, or income—contribute to health disparities. These inequities are a major public health threat and demand a concerted, interdisciplinary effort. At the College of Public Health, we dedicate ourselves to public health in all its parameters, from epidemiology to nursing, from social work to rehabilitation sciences. Social justice has always driven our work: This understanding that individual outcomes are intricately tied to the larger systems we inhabit is the foundation of our college.

Temple University College of Public Health’s interprofessional culture fosters collaboration both within and outside the College. We value differences among our faculty and believe that we can better serve and understand our Philadelphia community through the diversity of our individual faculty and our disciplines. Join us in our mission to develop progressive, compassionate researchers, practitioners, and clinicians to build a better tomorrow, grounded in creating the environments and health infrastructure that will make us the healthiest nation.

THE POSITION AND QUALIFICATIONS. We invite applications for faculty with a primary research focus in infectious disease, reproductive and/or perinatal epidemiology to join us in summer 2022. Those with an interest in respiratory infections, diarrheal diseases, malaria (or vector-borne diseases), tuberculosis, antimicrobial-resistant infections, HIV/AIDS, emerging infectious diseases and/or various topics relating to maternal and child health epidemiology are invited to apply. Those who model infectious disease dynamics are also welcome to apply.

THE DEPARTMENT. The Department of Epidemiology and Biostatistics combines curiosity with rigorous, applied methods that lead to compelling questions and impactful results to improve public health. This is a great opportunity to join a department experiencing significant growth. Our 17 faculty members conduct research in pediatric environmental health and immune responses, behavioral and chronic disease epidemiology, cancer prevention and control, substance use disorders, HIV/AIDS, hepatitis, environmental and occupational exposures, waterborne diseases, cognitive decline and cardiovascular disease. Additional areas include mediation, causal inference, missing data and measurement error, semiparametric regression, latent variable modeling and psychometrics. The department annually enrolls over 1,800 undergraduate and graduate students with diverse backgrounds and has more than 100 graduate students in five programs: PhD in Epidemiology; MPH degrees in Epidemiology (in-person and online), Applied Biostatistics and Environmental Health; and MS in Epidemiology. In fall 2022, our MS in Public Health Data Science will launch. We also have several graduate certificate programs, including a Maternal and Child Health Certificate.
THE COLLEGE. Devoted to an interprofessional environment for education, research and practice, the CEPH-accredited College of Public Health consists of academic units in the public health disciplines, health professions, and the School of Social Work, enrolling approximately 4,200 students. The College’s research aims to understand the fundamental factors that affect the health and well-being of individuals and populations by examining health problems through foundational research, policy and practice, and the development and dissemination of evidence-based interventions. We focus on social determinants of health and social justice with strengths in cancer, obesity, HIV, substance abuse, mental illness, mobility research, cognition and language, developmental disabilities, organ transplantation and aging. CPH research is funded by the National Institutes of Health, Department of Defense, National Science Foundation, Gates Foundation, and other major private foundation, state and federal agencies. The College is home to an Office for Community Engaged Research and Practice, the Center for Obesity Research and Education, and the Collaborative on Community Inclusion. The Office of Clinical Affairs and Interprofessional Education leads our clinical activities, including the COVID-19 RapidVax effort and forward-looking IPE within the College and throughout the university. The College is staffed by a robust complement of seasoned professionals including offices of Communications and Marketing, Information Technology, Sponsored Research, and Academic Affairs.

THE UNIVERSITY. Temple is an urban, research-intensive Carnegie R1 university located in historic and culturally rich Philadelphia, the nation’s 6th largest city. The city was ranked 3rd by The New York Times as a world tourist destination. The National Science Foundation ranks Temple among the top 100 universities in the country for research expenditures. Temple is the 6th largest provider of professional education in the nation and includes Schools of Medicine, Pharmacy, Podiatry, Law and Dentistry as well as research centers.

To apply, submit a detailed CV; a cover letter explicating your qualifications and experiences with diversity, equity, and inclusion; a one-page research statement; and a list of three to five references to cphsearch@temple.edu.

Application review begins immediately and will continue until the position is filled.

For more information about this position or to make nominations, contact Abbigail Ametrano, assistant director of faculty recruitment, at abbigail.ametrano@temple.edu.
