

EPIDEMIOLOGY AND BIOSTATISTICS

Instructional Faculty in Biostatistics

The Temple University Barnett College of Public Health Department of Epidemiology and Biostatistics is hiring a non-tenure track instructional faculty member in Biostatistics, and we invite applications for an enthusiastic instructor to teach undergraduate and graduate-level courses in biostatistics starting in the 2026-2027 Academic Year.

Instructional faculty teach a combination of in-person and online courses, and the University offers excellent professional development in teaching. Instructional faculty may engage in collaborative research with colleagues and participate in the Department's Biostatistics Core, which offers comprehensive biostatistical consultation and computational services to researchers in the College of Public Health and throughout Temple University, as well as those in other institutions. Faculty also are expected to contribute meaningfully to campus life through engagement in departmental, college, and university service. Salary and benefits are competitive and commensurate with credentials and experience.

QUALIFICATIONS.

We seek collegial faculty with an earned doctorate in biostatistics or a related discipline before the start date. Faculty should demonstrate potential for excellence in teaching, and a commitment to creating inclusive, accessible spaces for all students. Because the Department offers courses for students in multiple disciplines (e.g., nursing, kinesiology, health sciences), we prefer candidates experienced in teaching and mentoring students from different backgrounds in an inclusive setting and skilled in teaching quantitative courses to students with a range of aptitudes and using a variety of statistical software (e.g., SAS, R). Online teaching experience also is highly desirable. Rank is at the assistant professor of instruction.

THE DEPARTMENT.

The Department of Epidemiology and Biostatistics combines curiosity with rigorous, applied methods that lead to compelling questions and impactful results to improve public health. This is an excellent opportunity to join a department experiencing growth with research expenditures increasing >80% in the past 5 years and agreements for academic programming and research with international universities. The Department has 15 full-time faculty with expertise in mediation, causal inference, missing data and measurement error, semiparametric regression, latent variable modeling, and psychometrics as well as behavioral and chronic disease epidemiology, cancer prevention and control, environmental and occupational exposures, seroepidemiology and disease modeling, aging and cognitive decline, and cardiovascular disease. The Department annually enrolls over 1,800 undergraduate and graduate students with diverse backgrounds and offers five graduate programs: PhD in Epidemiology; MPH degrees in Epidemiology (in-person and online), Applied Biostatistics, and Environmental Health; and MS in Public Health Data Science. We also administer a graduate certificate in Applied Clinical Research. The Department also contributes to the College's nationally recognized BS in Public Health and administers a minor in Applied Epidemiology.

THE COLLEGE.

The Barnett College of Public Health's mission is to educate, innovate, and transform to bring about healthy, equitable, and thriving communities. Our CEPH-accredited College of Public Health embraces public health in all its disciplinary forms, fostering impactful teaching, scholarship, and interdisciplinary collaborations within and outside the college. We engage in interprofessional education, community and clinical practice, impactful research, and service learning, approaching our work with cultural humility as we advocate for positive change and prepare leaders to address the most pressing issues of our time. Social justice has always driven our efforts, and we understand that individual health outcomes are intricately tied to the larger systems we inhabit. The College consists of academic units in the public health disciplines, health professions, and the School of Social Work, enrolling approximately 4,200 students. We value differences among our faculty and believe that we can better serve and understand our communities through the diversity of our faculty.

The College is staffed by a robust complement of seasoned professionals within our Offices of Admissions and Recruitment, Communications and Marketing, Information Technology, Research Administration, and Academic Affairs. Temple's Center for the Advancement of Teaching provides outstanding programs and one-on-one mentoring and consultation to faculty and instructors to promote and support excellence in teaching.

THE UNIVERSITY.

Temple University, founded in 1884, is a Carnegie R1 (Very High Research Activity) institution and one of the nation's largest urban public research universities. Located in North Philadelphia, just 1.5 miles from Center City, Temple enrolls more than 30,000 students across undergraduate, graduate, and professional programs. As an anchor institution in North Philadelphia, Temple is deeply engaged with the surrounding community through educational partnerships, workforce development, and neighborhood initiatives. Faculty and students benefit from the university's dynamic urban setting, vibrant campus life, and opportunities to contribute to research, teaching, and service that make a meaningful impact locally and globally. We are committed to fostering a welcoming environment for students, faculty, and staff. We believe that diversity (of experiences, thought, etc.) enriches our learning environment and strengthens our academic community. We encourage applications from individuals whose backgrounds, experiences, and perspectives will enhance our commitment to these values.

*Applicants should email: a cover letter detailing their interest; curriculum vitae; a statement of teaching philosophy; a statement of contributions working effectively in an urban environment; and the names and contact information of 3-5 references to **epibio@temple.edu**. Application review begins immediately and will continue until the position is filled.*

*Contact Dr. Recai Yucel, Assistant Director of Biostatistics, at **recai.yucel@temple.edu** with questions or to make nominations.*
