

EPIDEMIOLOGY & BIOSTATISTICS

Instructional Faculty in Biostatistics or Epidemiology

The Department of Epidemiology and Biostatistics in the College of Public Health at Temple University is hiring a non-tenure track instructional faculty member in either Biostatistics or Epidemiology, and we invite applications for an enthusiastic instructor to teach undergraduate- and graduate-level courses in either biostatistics or epidemiology with a July 1, 2027 start date.

Instructional faculty teach a combination of in-person and online courses, and the University offers excellent professional development in teaching. Instructional faculty have opportunities to participate in collaborative research with colleagues and participate in the Department's Research Methods and Biostatistics Core, which offers comprehensive methodological and biostatistical consultation, as well as computational services to researchers in the College of Public Health, Temple University, and other institutions. Faculty are also expected to contribute meaningfully to campus life through engagement in departmental, college, and university service. Salary and benefits are competitive and commensurate with credentials and experience.

QUALIFICATIONS. We seek collegial faculty with an earned doctorate in biostatistics, epidemiology, or a related discipline before the start date. Faculty should possess strong quantitative skills and demonstrate potential for excellence in teaching, and a commitment to creating inclusive, accessible spaces for all students. Because the Department offers courses for students in multiple disciplines (e.g., nursing, kinesiology, health sciences), we prefer candidates experienced in teaching and mentoring students from different backgrounds and skilled in teaching quantitative courses to students with a range of aptitudes and using a variety of statistical software (e.g., SAS, R). Online teaching experience is also highly desirable. Rank is at the assistant professor of instruction.

THE DEPARTMENT. The Department of Epidemiology and Biostatistics combines curiosity with rigorous, applied methods that lead to compelling questions and impactful results to improve public health. This is an excellent opportunity to join a dynamic department committed to ensuring students have the academic support to excel in our programs and that alums have the skills and experience to succeed in their professions. The Department has 15 full-time faculty with expertise in mediation, causal inference, missing data and measurement error, semiparametric regression, spatial methods, high-dimensional data, latent variable modeling, and psychometrics as well as multiple study designs and methods, behavioral and chronic disease epidemiology, cancer prevention and control, environmental and occupational exposures, seroepidemiology and disease modeling, aging and cognitive decline, and cardiovascular disease. The Department annually enrolls over 1,500 undergraduate and graduate students with diverse backgrounds and offers five graduate programs: PhD in Epidemiology; MPH degrees in Epidemiology (in-person and online), Applied Biostatistics, and Environmental Health; and MS in Public Health Data Science. We also administer a graduate certificate in Applied Clinical Research. Further, the Department also contributes to the College's nationally recognized BS in Public Health and administers a minor in Applied Epidemiology, both of which are well positioned for continued growth as Temple University has achieved record first-year undergraduate deposits for the second consecutive year.

Temple University
College of Public Health

Temple University values diversity and is committed to equal opportunity for all persons regardless of age, color, disability, ethnicity, marital status, national origin, race, religion, sex, sexual orientation, veteran status or any other status protected by law.

THE COLLEGE. The College of Public Health's mission is to educate, innovate, and transform to bring about healthy, equitable, and thriving communities. Our CEPH-accredited College of Public Health embraces public health in all its disciplinary forms, fostering impactful teaching, scholarship, and interdisciplinary collaborations within and outside the college. We engage in interprofessional education, community and clinical practice, impactful research, and service learning, approaching our work with cultural humility as we advocate for positive change and prepare leaders to address the most pressing issues of our time. Social justice has always driven our efforts, and we understand that individual health outcomes are intricately tied to the larger systems we inhabit. The College consists of academic units in the public health disciplines, health professions, and the School of Social Work, enrolling approximately 4,200 students. We value differences among our faculty and believe that we can better serve and understand our communities through the diversity of our faculty. The College is staffed by a robust complement of seasoned professionals within our Offices of Admissions and Recruitment, Communications and Marketing, Information Technology, Research Administration, and Academic Affairs. Temple's Center for the Advancement of Teaching provides outstanding programs and one-on-one mentoring and consultation to faculty and instructors to promote and support excellence in teaching.

THE UNIVERSITY. Temple University, founded in 1884, is a Carnegie R1 (Very High Research Activity) institution and one of the nation's largest urban public research universities. Located in North Philadelphia, just 1.5 miles from Center City, Temple enrolls more than 30,000 students across undergraduate, graduate, and professional programs. As an anchor institution in North Philadelphia, Temple is deeply engaged with the surrounding community through educational partnerships, workforce development, and neighborhood initiatives. Faculty and students benefit from the university's dynamic urban setting, vibrant campus life, and opportunities to contribute to research, teaching, and service that make a meaningful impact locally and globally. We are committed to fostering a welcoming environment for students, faculty, and staff. We believe that diversity (of experiences, thought, etc.) enriches our learning environment and strengthens our academic community. We encourage applications from individuals whose backgrounds, experiences, and perspectives will enhance our commitment to these values.

Applicants should email: a cover letter detailing their interest; curriculum vitae; a statement of teaching philosophy; a statement of contributions working effectively in an urban environment; and the names and contact information of 3-5 references to ***epibio@temple.edu****. Application review begins immediately and will continue until the position is filled.*

Contact ***Dr. Resa M. Jones,*** *Department Chair* ***(resa.jones@temple.edu)*** *with questions or to make nominations.*
