Bio

Dr. Wilson is an environmental cancer epidemiologist by training with experience in community engagement and trans-disciplinary implementation research. She directs the [Kidney Cancer Research Prevention Program](#) at Temple University. Her research focuses on the intersection between genetic and environmental factors influencing kidney cancer risk, including trace element exposures and vitamin D metabolism. Dr. Wilson is the founding Principal Investigator (PI) for three studies including the Sunlight Nutrition, Skin, and Human Ancestry related to vitamin D Exposure and Synthesis (SuNSHADES) study, the Heavy Metals Exposure Among Mining-Impacted Indigenous Bolivians study, and the Technology-Linked Epidemiology Education Network, which combined have included over 2,000 participants. Overall, Dr. Wilson's research has identified several factors associated with greater renal cell cancer (RCC) risk including higher blood lead (Pb), lower serum calcium, lower dietary intake of flavonoids (quercetin), high dietary intake of fish in urban coastal regions, lower occupational sunlight exposure, and genetic variants in the vitamin D pathway (the vitamin D receptor (*VDR*), Calbindin-D_{28K} (*CALBI*)), including gene x environment interactions. Her research in vitamin D metabolism has identified gene x environment and gene x gene interactions involving *VDR*, *CYP2R1*, the vitamin D binding protein (*GC*) and *CALBI*, which are independent of genetic ancestry and race/ethnicity. This work has led to development of a novel vitamin D biomarker with provisional patent status from the US Patent and Trade Office (USPTO). Dr. Wilson's research has included diverse population groups in the United States (American Indian/Alaska Natives, African American, rural Appalachian), Bolivia (Spanish and Quechuan), Central/Eastern Europe, Finland and Sweden. Her work has been funded by the American Institute for Cancer Research (AICR), Pennsylvania State University (PSU), Pennsylvania Department of Health (PA DOH), United States (US) Centers for Disease Control and Prevention (CDC), US Food and Drug Administration (FDA), US National Institutes of Health (NCI and NIGMS), and US Naval Health Research Center. In total, Dr. Wilson directed \$3.4M in research funding while collaborating on an additional \$11.3M. She has been interviewed by news media including *USA Today* and the *Washington Post*.

In professional service, Dr. Wilson is a [collaborating member](#) of the Temple Fox Chase (Comprehensive) Cancer Center (FCCC), Chair-Elect of the International Network for Epidemiology in Policy ([INEP](#)), and Past Chair (2013-15) of the Epidemiology Section of the American Public Health Association (APHA). Dr. Wilson has served on public health, research, award, and/or career panels for the APHA, FCCC, NIH, PA DOH, PSU, Purdue University, Temple University, US Department of Defense, and Worldwide Cancer Research.

In her educational role, Dr. Wilson has served as a mentor and/or supervisor for 88 students and faculty from diverse cultures and racial/ethnic backgrounds. She founded, directed, and oversaw accreditation of a Council on Education for Public Health (CEPH)-accredited Doctor of Public Health (DrPH) program, including a dual JD/DrPH option. She was named Outstanding College of Medicine Mentor and the Inaugural College of Medicine Dean's Diversity Award Champion by PSU. Dr. Wilson's trainees have been admitted to academic posts, fellowships, and/or employment with Jefferson University, Johns Hopkins, Mayo Clinic, Mount Sinai Hospital, the National Cancer Institute, New Jersey DOH, PA DOH, PSU, Public Health Management Corporation, Stanford, Temple University, University of Buffalo, University of Colorado, University of Delaware, University of Pittsburgh, University of Wisconsin, University of Texas, US Food and Drug Administration, Vanderbilt University, and Yale University.
